- Designed product presentation.
- Defined and managed sales and advertisement budget.

SUMMARY

I am a full-stack developer looking for a 3-month internship that hopefully leads to a full-time job to put into practice what I've learned and tapping into my prior experience in sales and management, I hope to find creative ways to solve problems. Beyond being detail-oriented and interested in technical aspects, I am a team player, and I believe in the significant role of team work to solve even the most complicated problems.
